## B. Funding

We first list the funding sources and the distribution of expenses of each site separately. One should note that comparison between different years or between universities is not always straightforward due to different procedures of accounting.

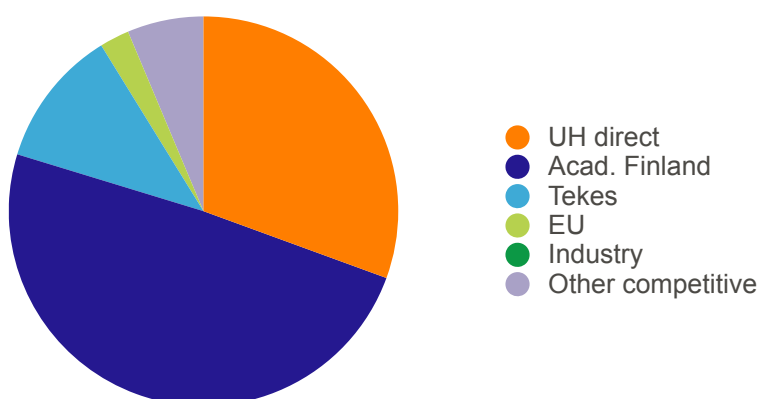

Kumpula's funding figures are shown in Table 1. Direct funding from University of Helsinki (UH) has been ca 1 MEur, of which a portion has directly been transferred to Aalto University to account for common administrative duties, and thus the direct funding to Kumpula is somewhat less than 1 MEur. Funding from the Academy of Finland is very large in 2010-2011 due to the Algodan Center of Excellence funding, and other large Academy projects. In the table of expenses, the "Other operational expenses" have increased in 2010-2011 due to several conferences arranged by HIIT, and some large equipment purchased to HIIT.

Kumpula	2008	2009	2010	2011	%

Figure 1: Kumpula funding 2011.

Otaniemi Innopoli's funding figures are shown in Table 2. We list separately the funding of two doctoral programmes of the Academy of Finland which HIIT coordinates: they do not fully contribute to HIIT's person-years or publications as most doctoral students are employed by other universities, but they constitute a largish part of HIIT's budget. Similarly in the list of Expenses, the large amount of "other operational expenses" mainly consists of the expenses of these doctoral programmes.

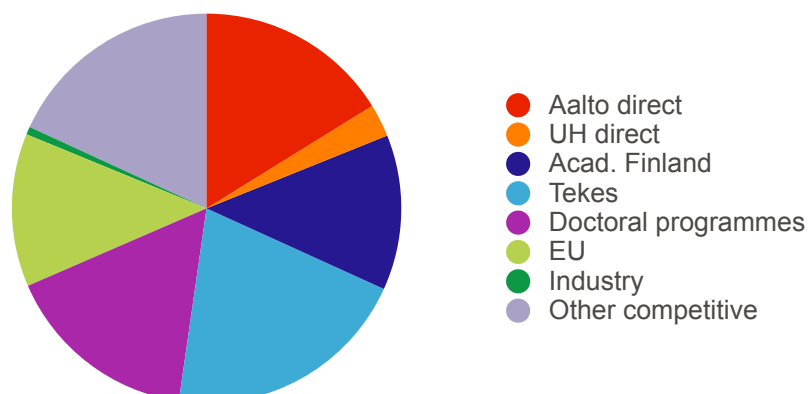

In Table 2, in the category Other, we list competitive grants given by Foundations and Aalto University. This also includes a Research Assessment Exercise bonus given by Aalto University.

Finally we list the funding sources and the distribution of expenses for the whole HIIT in Table 4. There is a slight decrease in funding, mostly attributed to a smaller portion of Tekes and industry funding.

## C. Personnel

In 2011 HIIT staff completed 135 person-years on HIIT funding; this is significantly less than in the previous year (175). Many additional persons affiliated with HIIT are funded by participating departments, or personal grants either from the Academy of Finland or Foundations. The diversity of affiliations is characteristic of HIIT personnel: the most common is an affiliation with one or both of the parent universities, but there are also some who share their time between HIIT and some other organisation. Thus the total number of personnel (272) is much higher than the number of person-years completed by HIIT funding.

The distribution of person-years per site is shown in Table 5. The Otaniemi T building row comprises HIIT researchers both at Aalto University's ICS department and CSE department.

Staff (person-years)	2006	2007	2008	2009	2010	2011
Kumpula	55	57	57	60	55	40
Otaniemi Innopoli	55	60	82	83	72	66
Otaniemi T building	9	12	26	42	48	29
<b>total</b>	<b>119</b>	<b>129</b>	<b>165</b>	<b>185</b>	<b>175</b>	<b>135</b>

Table 5: Number of person-years paid by HIIT 2006-2011.

Another way to visualize the personnel is in Table 6 which shows the distribution of person years per personnel group, again only listing the person years completed by HIIT funding.

Staff (person-years)	Kumpula	Otaniemi Innopoli	Otaniemi T building	total
seniors, postdocs	12	15	7	34
doctoral students	14	22	19	55
project researchers	1	9	0	10
research assistants	11	13	3	27
administration	2	7	0	9
<b>total</b>	<b>40</b>	<b>66</b>	<b>29</b>	<b>135</b>

Table 6: Distribution of person-years by personnel groups 2011.

The number of non-Finnish staff members is about 20 per cent. Almost all non-Finns come from Europe, China, India and India's neighbouring countries. Figure 5 shows the distribution of nationalities in all personnel, also including those not counted into HIIT's person-years.
