B. Funding

We first list the funding sources and the distribution of expenses of each site separately. One should note that comparison between different years or between universities is not always straightforward due to different procedures of accounting.

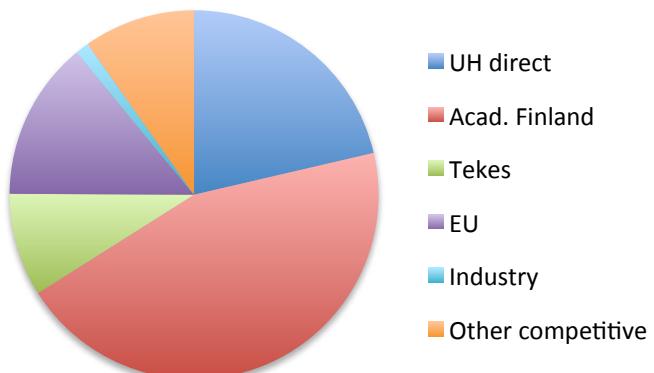

Kumpula's funding figures are shown in Table 1. Direct funding from University of Helsinki (UH) has traditionally been ca 1 MEur, of which a portion has directly been transferred to Aalto University to account for common administrative duties, making UH's direct funding to Kumpula 0.81 MEur. External funding has increased significantly, most notably by new EU projects. The decrease in "Other operational expenses" and the increase in "Service charge" are partly due to different accounting procedures in 2011 vs 2012.

Kumpula	2009	2010	2011	2012	%
Total funding	2,272,824	3,110,733	2,649,318	3,792,231

Table 1: Kumpula funding 2009-2012.

Figure 1: Kumpula funding 2012.

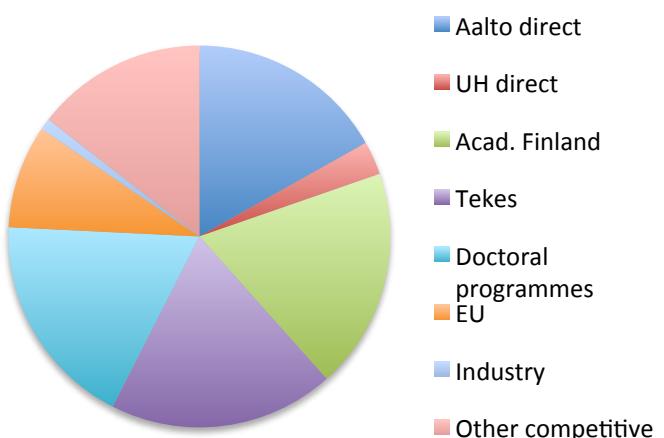

Otaniemi OIH's funding figures are shown in Table 2. We list separately the funding of two doctoral programmes of the Academy of Finland which HIIT coordinates: they do not fully contribute to HIIT's person-years or publications as most doctoral students are employed by other universities, but they constitute a largish part of HIIT's budget. Similarly in the list of Expenses, the large amount of "Other operational expenses" mainly consists of the expenses of these doctoral programmes. The "Service charge to Aalto" has increased significantly due to Aalto's new policy of internal charges.

OIH	2009	2010	2011	2012	%

Finally we list the funding sources and the distribution of expenses for the whole HIIT in Table 4. The total funding has increased from 2011, which is mostly attributed to an increase in the funding from the Academy of Finland and European Union.

C. Personnel

In 2012 HIIT staff completed 144 person-years on HIIT funding. In addition, many persons affiliated with HIIT are funded by participating departments or personal grants either from the Academy of Finland or Foundations. The diversity of affiliations is characteristic of HIIT personnel: the most common is an affiliation with one or both of the parent universities, but there are also some who share their time between HIIT and some other organisation. Thus the total number of personnel (over 300) is much higher than the number of person-years completed by HIIT funding.

The distribution of person-years per sites is shown in Table 5. The Otaniemi T building site comprises HIIT researchers both at Aalto University's ICS department and CSE department.

Staff (person-years)	2007	2008	2009	2010	2011	2012
Kumpula	57	57	60	55	40	58
OIH	60	82	83	72	66	50
Otaniemi T building	12	26	42	48	29	36
total	129	165	185	175	135	144

Table 5: Number of person-years paid by HIIT 2007-2012

Another way to visualize the personnel is to look at the distribution of personnel groups per person years, again only listing the person years completed by HIIT funding. Research personnel having a Doctoral degree are listed as "seniors or postdocs"; research personnel having a Master's degree but not a Doctoral degree are listed as "researchers"; and those studying for their Master's degree are listed as "research assistants".

Staff (person-years)	Kumpula	OIH	Otaniemi T building	total
seniors, postdocs	18	16	9	43
doctoral students	16	17	21	54
project researchers	0	4	0	4
research assistants	22	6	6	34
administration	2	7	0	9
total	58	50	36	144

Table 6: Distribution of person-years by personnel groups 2012.

The number of non-Finnish staff members is large, 37 per cent. Almost all non-Finns come from Europe, China, India and India's neighbouring countries. Figure 5 contains all personnel, also including those not counted into HIIT's person-years.
